

COS20019 Cloud Computing Architecture Week 2

Tran Minh Hai

10/01/2025

Waiting for students in Hanoi to come to class!

Week 2

- Access Labs and Assignment
- Compute Services
 - EC2
 - Containers: EKS, ECS, App Runner
 - Serverless: Lambda
- Hands-on Lab
 - Create EC2
 - Setup and run a webserver (VIM basics)
- ACF Lab 3 (First Assignment)

How to get a Good Score this course?

- Weekly hands-on lab 13 x 0.5 or 1 scores 10%
 - AWS Academy Courses (ACA, ACF)
- Assignment: 1a, 1b, 2, 3 60% of total scores
 - Report format? IEEE One Column Format?
 - AWS Academy Course (Lab Learner 50\$)
- Quiz: 1, 2 each 60 questions within 1 hour 30%

AWS Academy Courses

- Give an example of a public IP address?
 - X.X.X.X? 54.123.45.67
- RFC Standard, IP version 4 using 32 bits
- Private IP ranges:
 - 192.168.X.X
 - 10.0.0.X.X
 - 172.16.X.X
- What is port/door number of SSH protocol?
- What is the port range? Maximum how many port/door?
 - 30,000
 - 10,000
 - 65,000
- Email using SMTP, what is port for email SMTP?

Hand-ons Lab (Demo not Assignment)

- GitHub <https://github.com/cdk-entest/swinburne-dn-cos20019>
- Create an EC2
- Setup a web server
- User data vs manual command
- Run a simple app
 - AI chatbot using Amazon Bedrock
 - Serving static file
 - Upload an image to web server

Compute Service

- Amazon EC2 (Elastic Compute Cloud)
- Serverless – AWS Lambda Function
- Container Service
 - Amazon EKS (Elastic Kubernetes Service)
 - Amazon ECS (Elastic Container Service)

First Assignment ACF Lab 3

- Access AWS Academy
- Start Lab
- Screen shot
- Submit report IEEE format
- [Rubric](#)
- Sample report

Class Logistic

- Attend check within first 15 minutes
- 17/2 No class COS20019
 - Hanoi: 08/02
 - Danang: 10/2
- When is first assignment?
